Xmotion Mobility Platform Providing Symbol MC70 Support

Melbourne, March 2006 – InterDev today announces support for the new Symbol MC70 device within their innovative Xmotion Mobility Product. This further extends support for Symbol devices which already includes platforms such as the 9000 series, 8800 series and the MC50 platform.

“The MC70 provides a unique fit for mobility customers requiring an enterprise grade device which is capable of field operations” said Andrew Rossington, InterDev Marketing Manager. “The level of support for networking and its” robust design allows customers to deploy the MC70 across a multitude of applications from Transport and Logistics to Field Service. Historically, Symbol has provided innovative products to suit the demands of customers requiring Mobile devices for mission critical applications. The MC70 now provides further options for these customers and provides more flexibility in deployment of mobility solutions”

Symbols ISV programme is very supportive of partners and allows us to rapidly test software against new devices” said John Bird, Technical Director at InterDev. “Xmotion support for the MC70 was completed in a very rapid time, in days not weeks, which is a testament to the MC70’s support for Windows Mobile and the extensive Software Development Kit (SDK).”

Xmotion is an Innovative Mobility product that delivers reliable, secure and cost effective mobile data solutions for enabling wireless business applications. The Xmotion product is gaining rapid acceptance in the market due to its enterprise architecture and low deployment and support costs. Currently, Xmotion is in use within varying market verticals including transport, logistics and service based organisations. The ‘application ready’ framework provided by Xmotion, allows business applications to be rapidly developed or migrated to Xmotion, without the need to understand the complex communication, security and fault tolerance issues. Xmotion provides a full suite of mobility features that ensure business applications are simple to deploy, reliable, secure and cost effective.
