Case Study

Neils Transport

October 2006

Xmotion[®] - Transporta

Mobility Case Study

Neils Transport are a regional based carrier providing extensive services to some of Australia's largest manufacturing companies. Neils sought a mobility solution to provide real-time job dispatch along with real-time event capture and integration with their Minorplanet Vehicle

of the real-time dispatch and tracking functions. InterDev also developed a B2B service providing transparent receipt of jobs from their major client.

The solution delivered, shared the existing Minorplanet in-cab GPS and communication systems providing Neils with a single GPRS/Wifi

Management and GPS solution.

In addition, the requirement for B2B integration to one of their largest clients was required in order to automatically receive jobs and dispatch them to their drivers.

Partnering with Minorplanet, Interdev provided Xmotion[®] Transporta which provided the mobility solution inclusive

communication service.

Neils now provide a leading edge mobility solution placing them well ahead of their competitors and offering greater efficiencies and availability of data. Information is available immediately for customers and the B2B solution will provide Neils with cost efficiencies.

Xmotion Delivered

- Simplicity of use
- Real-time event information
- Guaranteed data delivery
- Integration with Minorplanet
- POD - Signature on Glass
- B2B Services
- Device flexibility
- Paperless Collection

The Xmotion[®] Transporta Solution

Xmotion is an Innovative Mobility product that delivers reliable, secure and cost effective mobile data solutions for enabling wireless business applications. The Xmotion product is gaining rapid acceptance in the market due to its enterprise architecture and low deployment and support costs. Currently, Xmotion is in use within varying market verticals including transport, logistics and service based

organisations. The Xmotion[®] Transporta application is a fully featured Transport solution leveraging the Xmotion Mobility Platform. Transporta provides dispatch, real-time and guaranteed message delivery along with POD, full tracking history and intelligent selection of networks. Transporta also provides seamless integration to many existing business systems.

Solution Summary

Company	Neils Transport
